Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-30, drawn to a method for treating a liquid stream with a solid adsorbent, classified in class 210, subclass 661.
- II. Claim 31, drawn to a purification facility, classified in class 210, subclass 189.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group II could be used in another method, different from that of Group I. For example, this system could be used as a fixed bed, rather than as a fluidized bed. Alternatively, this system could be used to purify a fluid other than a liquid (i.e. a gas).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can normally be reached on Monday through Friday from 8:30 AM to 5:00 PM. If
